Qingyuan Tian

904-789-1644 | qingyuantian2006@gmail.com | linkedin.com/in/qingyuan-tian-35b45b2b3/ | github.com/Yawnic3

Education

University of Florida GPA: 3.82/4.0

Bachelor of Science in Computer Engineering, Minor in Business Administration *Aug. 2024 – May 2028*

Technical Skills

Languages & Frameworks: Python, C/C++, C#, JavaScript, TypeScript, SQL, HTML/CSS

Technologies: React, Node.js, Express.js, MongoDB, AWS, Linux, Docker, Postman, Git/GitHub, TensorFlow, PyTorch, OpenCV, NumPy, pandas, Matplotlib, .NET

Concepts: REST APIs, Authentication/Authorization, Data Structures, Algorithms, OOP, Operating Systems, Computer Architecture

Experience

Software Engineering Intern - CAD & Process Automation Jul. 2026 – Sep. 2026

Victoria Marine *Palatka, FL*

- Developed an AI-accessible part-nesting tool by exposing a backtracking and dynamic-programming optimization engine through an MCP server integrated with the AutoCAD C#/.NET API, reducing calculation time by over 90% and minimizing material waste.
- Engineered and implemented a dynamic table-identification pipeline using Python, PyMuPDF, OpenCV, and PaddleOCR to locate variable-format BOM tables in engineering PDFs, extract part numbers, quantities, stock specifications, weights, and revisions, and export validated data into structured Excel workbooks.

Software Engineering Intern Jan. 2026 – Jul. 2026

CourseConnect *Gainesville, FL*

- Developed and shipped 12+ production features using React, TypeScript, Firebase Auth, Firestore, and Cloud Functions, supporting 2,000+ active students.
- Optimized Firestore queries and data models, reducing average query latency by 40% while improving responsiveness.
- Implemented role-based access control (RBAC) and transactional Firestore operations, preventing unauthorized access and ensuring data consistency across core user workflows.

Projects

Workday Autofill Chrome Extension | *JavaScript, Chrome API, HTML/CSS*

- Built a Chrome extension with resilient DOM traversal and reusable field-mapping logic to autofill dynamically rendered Workday application forms without external APIs.
- Reduced manual form-completion time by approximately 70% across multi-page application workflows.

Chomp Change | *MongoDB, Express, React, Node.js, TypeScript, Postman*

- Built a money-pooling platform with group creation, member permissions, shared balances, and transaction tracking.
- Designed and implemented 20+ REST API endpoints with JWT authentication and role-based access control.
- Reduced average MongoDB query latency by 35% through schema redesign, compound indexing, and query optimization across 1,000+ seeded records.

NoteShare | *MERN Stack, AWS, Docker, Git/GitHub, Linux, Postman*

- Built and deployed a full-stack academic notes platform that enabled students to upload, search, and retrieve course-specific study materials.
- Built React interfaces and backend services for authentication, uploads, metadata storage, and document retrieval.
- Reduced initial page-load time by 33% through client-side caching, paginated retrieval, and reusable React hooks.

Leadership and Involvement

Content Strategist & Creator May 2022 – Present

Yawnic3 *Remote*

- Built and managed a data-driven content strategy reaching 10M+ monthly views and 18k+ followers.
- Generated $2,000+ through partnerships; earned features from ESPN, House of Highlights, and other major platforms.
